

# **PHA DRIVERS** We need Your car for the 2023 PHA race car display at the May 12 and 13 Carlisle Import/Performance Nationals

Since 2006 the PHA has enjoyed a major presence at the Carlisle Import/Performance Nationals through our display that each year has attracted hundreds of visitors who stopped by to learn who we are, what we do and how our racing activities promote the oldest continuing form of automobile completion – hill climbing. Our exhibit includes constantly running video, still pictures, printed literature and a large attractive display of PHA race cars and their drivers who enjoy interacting with visitors. Our race cars have always been the most popular and interesting part of our exhibit. **Participation for us is totally free.** This includes PHA drivers, race car, tow vehicle and its occupants plus trailer.

**The Carlisle Import/Performance Nationals is the largest import/performance car show in the U.S.A.** Our display will be located under roof in the large open-sided race car pavilion at the East side of the showgrounds. There will be adequate space for all our tow vehicles and trailers to park in close proximity to the pavilion for the weekend. **The PHA exhibition will be open both Friday and Saturday, May 12 and 13 from 9 a.m. until 6 p.m.** We need a minimum of 25 PHA cars for our display. In past years our displays served well to publicize and promote the PHA and its activities.

If you plan to participate please complete the on-line application by clicking on the link [www.CarlisleFeatures.com](http://www.CarlisleFeatures.com) then fill out the application, add a picture of your car and send it back to Carlisle Productions as soon as possible - hopefully prior to May so we can reserve a space for your car. **In order to be accepted to show you must indicate on the application in the space under car history that your car is a PHA race car - no other information related to car history is necessary.** While the application asks for several pictures of your car, one picture will be sufficient for PHA cars. Drivers may either leave their race cars overnight Thursday and/or Friday in their paddock display space inside the pavilion or return it to their trailer space for safe keeping. Carlisle Productions provides 24-hour roving security throughout the weekend. To show Friday and/or Saturday race cars need to be in place under roof by 9 a.m. Our display will close at 6 p.m. on both days. **Drivers may choose to show on Saturday only if they wish.** For drivers exhibiting their cars both days, or for those who wish to arrive Thursday or Friday evening, there is nothing to prevent participants from sleeping in their trailers or tow vehicles overnight. Both tent camping and open fires in this area are prohibited. **Drivers whose cars are accepted will be notified on-line by Carlisle Productions. Upon first arrival, drivers must stop at Gate 3 to pick up admission credentials for their race cars, tow vehicles and trailers plus occupants.** If you plan to show your car - in addition to completing and sending back the application - please notify Gordon Wise at redhotvr6@hotmail.com or by phone at (717) 964-3044 so he and John Pitman, Grace Huntzinger and Don McLaughlin - organizers of the exhibit - can reserve sufficient space for you in the paddock.

**Bring your family and friends. PHA cars previously on display are more than welcome to join us again.** Come and experience the fun while enjoying the show as well as the companionship with your fellow PHA drivers. Attendance at Carlisle for our drivers has always been enjoyable. The show is overflowing with car culture while offering lots to do. Let's make a great impression as we promote hill climbing with the PHA.
